DEROX[®]
DOORS

Derox Philosophy

The steps of transparency and truth are difficult to build, but Derox does it anyway

Through the doors of Derox

Derox Doors is an abode for a hundred doors. Derox has been preparing itself to become a renowned manufacturer of doors. In this expedition, Derox has become one of the exclusive manufacturers of uPVC doors in South India. uPVC (unplasticized polyvinyl chloride), or rigid PVC, is a sustainable and long-lasting material that is a top choice in the construction industry. Since it is unplasticized, it has higher insulation. With the help of experience and technology, Derox has mastered the process of creating the world's best doors. Quality and an eye for perfection are the key concepts in our results. A sense of satisfaction is created in the customers by this. We deliver quality to our patrons at the most economical price. uPVC is an affordable option for everyone who welcomes style at a competitive price. Our connection with these valuable customers is through our dealers. Every product that reaches the market is a 100% make in India product. Derox's products are non-toxic, and the profiles are PUR laminated using German glue. The popularity of uPVC materials has been on the rise as the doors and windows complement modern and traditional architecture.

**PRECISION IN
EVERY DESIGN**

Something for Nature

A conscious effort to preserve nature is a quality of people with perspective. By choosing Derox uPVC, you are giving a reason to propagate green alternatives. With every door or accessory, the patrons receive loyalty called brownie points. Derox, with its 100% recyclable and lead-free option, eminently protects several resources. The ecological balance of nature is well preserved with this brilliant choice. During production, Derox uPVC profiles do not produce excess waste, nor do they require a lot of energy to produce when compared to wood and aluminium alternatives.

The Serene Pick

The profiles manufactured using uPVC generally offer superior sound proofing. The double seal system in the Derox uPVC doors dramatically cancels the noise and makes the atmosphere peaceful. You can remain calm in the face of loud traffic, unpleasant sounds, and other distractions. You are just a step away from creating a peaceful place and a stress-free life.

Characteristics

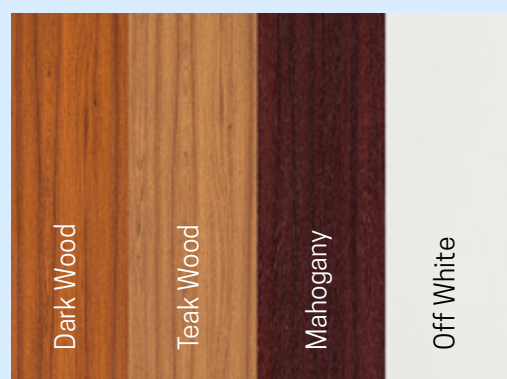

-  Eco-Friendly
-  Energy Saving
-  Soundproof*
-  Water Resistant
-  Termite Proof
-  Corrosion Proof
-  Long Lasting
-  Maintenance Free
-  Highly Durable

Water and Termites do not Stand a Chance

Water damage is a common problem that we have to face when choosing an alternative option, especially for wooden profiles. Derox uPVC is an exclusive solution to keep out water during rain and other water conditions. Derox is a long-lasting option that won't stretch or suffer from colour migration. With Derox, the magic of moisture will never work. Termites are yet another question when it comes to furniture. As Derox uPVC doors are synthetic products, it is not necessary to spend on termite control procedures. This property of Derox uPVC doors keeps termites and other insects away.
